

“We originally used Roundup®, but it bled a lot and took longer to work; we could not see visible signs of weeds dying for about a week or week and a half. With Finale we saw weeds dead in three days and it does not move through the soil. If you spray a spot the size of a pencil point, it stays in that spot.”

**WHAT IT IS.**

Exceptionally powerful, non-selective, broad spectrum herbicide

**WHAT IT DOES.**

Fast, nonselective control of emerged weeds—even tough weeds like poison ivy and dandelion

**WHY IT BEATS THE COMPETITION.**

- Faster—visible results in 1-4 days under many conditions
- Rapid control without the regrowth of typical burndowns
- Longer application window—effective in spring and fall, too
- Does not translocate in most plants, only kills what you spray it on

**HOW IT MAKES YOUR JOB EASIER.**

The herbicide of choice when the worst weeds absolutely, positively must go—and go *now*

## THE SCIENCE OF FINALE® HERBICIDE.

Finale® herbicide gives you fast, effective control of a broad spectrum of emerged annual and perennial grasses, broadleaf weeds and woody species. It's absorbed rapidly through green tissue and produces results in one to four days under many conditions. And it controls even the toughest weeds, like poison ivy, dandelion and thistle.

Finale herbicide has minimal soil-residual activity, so transplanting or seeding is possible hours after application. It's also an excellent tank mix component, compatible with many popular herbicides.
