

Tough weeds controlled – FAST!

T-Zone™ Broadleaf Herbicide for Tough Weeds provides exceptional broadleaf weed control in cool-season turfgrasses. T-Zone contains four active ingredients including triclopyr ("T"), a proven ingredient for hard-to-control weeds.

When the triclopyr is combined with sulfentrazone (ZONE), it makes T-Zone fast-acting with visible activity in hours. Weed death can occur within 7 to 14 days. Sulfentrazone, a protox inhibitor, works by preventing a key enzyme required for chlorophyll production.

Tests have consistently shown control of tough weeds like wild violet, ground ivy, black medic, oxalis, clover, spurge, speedwell and lespedeza. The oil-based formula cuts through the cuticle of the toughest weeds.

Hard-working triclopyr, when combined with fast-acting sulfentrazone and precise ratios of 2,4-D and dicamba, provides premium weed control. T-Zone affects multiple sites within broadleaf

weeds with symptoms including rapid leaf and stem curl, twisting, yellowing and browning. As a bonus, the sulfentrazone provides suppression of young and actively growing yellow nutsedge.

T-Zone opens up more application opportunities than most herbicide products. Improved cool-weather performance allows applications earlier and later in the growing season. Rainfast in as little as 3 hours, there is less concern about weather interference.

Add T-Zone to your tank and members or clients will see the fast results, reducing the number of complaints or call backs. T-Zone has a CAUTION signal word. A low-odor formulation, T-Zone can be applied without raising unnecessary concerns over pesticide applications.

WILD VIOLET

GROUND IVY

BLACK MEDIC

CLOVER

DANDELION

YELLOW NUTSEDGE*

* Suppression only

- **Four active ingredients**
- **Contains triclopyr for hard-to-control weeds**
- **Oil-based formula cuts through the cuticle of the toughest weeds**
- **Fast visual response**
- **Reduces call backs**
- **Low-odor formula**
- **Cool-weather performance (as low as 50°F)**
- **Suitable for applications up to 85°F**
- **Rainfast in 3 hours**
- **Yellow nutsedge suppression**
- **Designed for residential, commercial and golf sites**

RECOMMENDATIONS

Post-emergence broadleaf weed control in home lawns, golf courses, parks, commercial property, schools, sod farms, roadsides and cemeteries, especially where rapid visual results are an advantage.

ACTIVE INGREDIENTS:

Triclopyr BEE, butoxyethyl ester	8.40%
Sulfentrazone	0.73%
2,4-D, 2-ethylhexyl ester	31.82%
Dicamba acid	2.43%
Inert Ingredients	56.62%

EPA Reg. No. 2217-920

PACKAGING:

4 X 1 gallon per case:	
shipping weight	36 lbs.
2 X 2.5 gallons per case:	
shipping weight	46 lbs.
