

# NyGuard<sup>®</sup> PLUS

## Flea & Tick Premise Spray

NyGuard<sup>®</sup> Plus Flea & Tick Premise Spray offers quick acting, long-lasting (up to seven months) flea and tick control in a unique no-drip application that also eliminates pet odors.

- Proprietary formula kills fleas, ticks, flea eggs and larvae
- Prevents fleas and ticks from developing into egg-laying adults
- Contains NyGuard Insect Growth Regulator
- Uses patented odor neutralizing technology that eliminates pet odors, including urine
- Leaves fresh, clean scent
- Continuous flea protection for seven months
- Uses innovative spray nozzle for no-drip application
- For use in residential and commercial sites
- Treats up to 2,000 square feet

### Product Specifications

<b>Signal Word</b>	Caution
<b>Packaging</b>	12 x 17 oz. aerosols per case
<b>EPA Registration Number</b>	1021-2580
<b>Food Handling</b>	Not for use in food handling areas
<b>Stability of Undiluted Product</b>	Not Applicable – aerosol
<b>Stability of Diluted Product</b>	Not Applicable – aerosol
<b>Appearance</b>	Milky, white liquid (concentrate in can)
<b>Odor</b>	Fresh, clean scent
<b>Active Ingredients</b>	Sumithrin, MGK 264, Pyriproxyfen
<b>Flammability</b>	Contents under pressure
<b>Mode of Action</b>	Sodium channel inhibitor – disrupts insects' nervous system Juvenile hormone mimic
<b>Class of Chemistry</b>	Pyrethroid, Insect Growth Regulator (IGR), synergist
<b>Respirator Required</b>	Not required
<b>Mix or Dilute in</b>	Not applicable – ready-to-use aerosol
<b>Activity</b>	Contact kill, residual activity
<b>Shelf Life</b>	3 years or more if stored at room temperature

### Use Areas

#### For indoor use only

Homes  
Hotels  
Offices  
Hospitals  
Apartments  
Schools  
Dorms  
Warehouses  
Veterinary clinics  
Commercial buildings

#### Where Fleas and Ticks Hide

Carpet  
Furniture  
Floors

#### Not For Use on Humans or Animals

## Method of Application

- Aerosol spray
- Spot treatment
- Surface spray
- Crack and crevice spray

## Best Practices when using NyGuard Plus Flea & Tick Premise Spray

For best results before any carpet/surface treatment, vacuum thoroughly before spraying and immediately dispose of vacuum bag in outside trash. To test for staining before treatment, SHAKE WELL and make a test application to surfaces to be treated in an inconspicuous place.

### Fleas & Ticks:

Hold can 2 or 3 feet from surfaces to be treated. Turn container upside down and point valve toward surface to be sprayed. Be sure to apply uniformly using a sweeping motion to carpets, rugs, flooring, floors, drapes and all surfaces of upholstered furniture including under cushions. Avoid over wetting furniture and carpeting. A fine mist or spray applied uniformly is all that is necessary to kill fleas and ticks. Be sure to treat pet bedding, as this is a primary breeding site for fleas. No need to remove pet bedding after treatment. DO NOT TREAT PETS. Use a registered flea control product on your pets in conjunction with this treatment.

## Use NyGuard Plus as part of an IPM program

For best results, use NyGuard Plus as part of an integrated pest management program to control the targeted pest.

## Key Target Pests Controlled

Fleas & Ticks  
Cockroaches  
Dust Mites  
Carpet Beetles  
Lice

### Residual Efficacy Post 14 Days Treatment

Cat Flea – *Ctenocephalides felis*  
24 hours after exposure to carpet

### Residual Efficacy Post 14 Days Treatment

Brown Dog Ticks – *Rhipicephalus sanguineus*  
24 hours after exposure to carpet

Always read and follow label and MSDS directions.
