

FIFRA Section 2(ee) Recommendation: This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. All applicable directions, precautions and Conditions of Sale and Warranty on the EPA-registered label are to be followed. The user must have this recommendation in their possession at the time of use. For use in all states where 2(ee) recommendations are recognized, except NY (pending approval). CIRKIL RTU is registered for use in all US states and the D.C.

For Use of CIRKIL® RTU in Rag in a Bag™ Protocol against Bed Bugs

It is a violation of Federal law to use the product in a manner inconsistent with its labeling.

1. Rag in a Bag™ treatment can be applied to treat items that cannot be sprayed directly with a liquid product, such as electronics, video games, DVD's, books, or shoes.
2. Place infested items in a non-porous plastic bag such as a heavy-duty garbage bag or contractor bag.
3. Put a non-porous plastic sheet such as grocery bag on top of the infested items to prevent them from coming in direct contact with treated rag.
4. Place a rag(s) or 4 to 5 sheets of highly absorbent paper towel on the protective plastic sheet.
5. Apply 1 to 2 fl.oz. of CIRKIL RTU to approximately 1.5 to 3 sq.ft. of surface area on a rag(s) or absorbent material. Tie the plastic bag and leave it sealed for 5 days to control bed bug adults, nymphs and eggs.

See **Table 1** for appropriate dose of CIRKIL RTU.

Table 1. Amount of CIRKIL RTU and time required to achieve 100% Bed Bug/Eggs Mortality in different items

Bag Contents (items being treated)	Volume of Cirkil RTU (fluid oz.)	Time sealed
Electronics, hard plastics/metals	1.0	5 days
DVD's, Video Games, CD's	1.0	5 days
Books, magazines	1.5	5 days
Shoes, handbags, etc.	1.5	5 days

Always read and follow label directions when using CIRKIL RTU.
