SHAKE WELL BEFORE USING

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed. Avoid contact with eyes and skin. May cause eye and skin irritation. In case of contact, wash affected area with water immediately and continue for fifteen minutes. Call a doctor if irritation persists.

GENERAL INFORMATION

F.M.-160 is a foaming agent designed for use in foam generating equipment. This product is temperature stable. When dispensed, this product produces a dense, readily visible, white foam of sufficient longevity under normal conditions for many applications. Using this product in field marking systems helps eliminate costly spray gaps and harmful overlaps that can occur during the application of pesticides and fertilizers. To produce a good quality foam, be certain to flush and clean the foam generating equipment thoroughly before each use.

DIRECTIONS FOR USE

Apply this product at a rate of 1 gallon per 160 gallons of water. This dilution rate will produce an adequate amount of foam from most types of foam generating equipment. The best dilution rate depends on water hardness, equipment, and foam persistence required.

Note: Foam life will vary with water hardness, humidity, temperature, and soil moisture content.

MIXING: Fill foam generator one-fourth full with water and add the required amount of this product. Add enough water to fill foam generator to one-half full. Do not fill above one-half full as this may impair the operation of the foam generator.

The ideal foam consists of small tight cells and is not so dry as to blow away or so wet that it has no body. Reduce air pressure if foam is wet and is coming out as a creamy liquid. Use less of this product per unit volume of water or increase air pressure if foam is too dry. Foam droppings of 3 to 5 inches in diameter are recommended for better visibility and longer stability.

STORAGE AND DISPOSAL

PRODUCT STORAGE: Protect from freezing. If stored in cold or freezing weather, this product may separate or thicken. This will not harm the performance. Before using, allow to warm to room temperature and stir thoroughly. Store in original container. Keep container tightly sealed. Do not allow chemicals or water to be introduced into the contents of this container. Do not store near heat or open flame. Do not store with oxidizing agents or ammonium sulfate.

CONTAINER DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Triple rinse (or equivalent) and add rinsate to foam tank then offer for recycling or reconditioning, or puncture and dispose of according to State and Local authorities. If burned, stay out of smoke.

WARRANTY—CONDITIONS OF SALE

OUR RECOMMENDATIONS FOR USE of this product are based upon tests believed reliable. Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the Seller. Buyer assumes all risks of use, storage and handling of this material not in strict accordance with directions given herewith.

In no case shall the Manufacturer or the Seller be liable for consequential, special or indirect damages resulting from the use or handling of this product when such use and/or handling is not in strict accordance with directions given herewith. The foregoing is a condition of sale by the Seller and is accepted as such by the Buyer.
