

MotherEarth[®]

Protect your home with help from Mother Earth.

 **BASF**

The Chemical Company

MotherEarth®

Responsible Pest Management

Responsible pest management involves understanding your unique needs and then making informed decisions on products and techniques used as part of an overall pest management strategy. Information gathered during the inspection and through our communication with you will help to determine the treatment options most appropriate to your situation. This responsible pest management process ensures that you receive the proper service where and when you need it.

New Choices for pest management, directly from Mother Earth

Now there are new choices to help protect your home from unwanted pests. Introducing MotherEarth, an exciting selection of new pest management tools. MotherEarth products are highly effective in eliminating ants, cockroaches, crickets, wasps, hornets, silverfish and other household invaders. **Depend on MotherEarth to protect your home from unwanted pests.**

MotherEarth® D Pest Control Dust

is a diatomaceous earth product that offers **broad-spectrum, long-lasting control of crawling insects**. It is a desiccant dust which is mined directly from Mother Earth and controls pests by causing dehydration.

MotherEarth® Granular Scatter Bait

combines an attractive food source with boric acid, an insecticide that is mined directly from Mother Earth. This bait product delivers **long-lasting control of ants, cockroaches, crickets, silverfish and other home invaders.**

MotherEarth[®]
Wasp & Hornet Jet Spray
and **MotherEarth[®]**
ProCitra-DL[®] Contact
Insecticide effectively
controls bees, hornets,
spiders, yellowjackets and
wasps. This product features
d-limonene, which is derived
directly from orange and other
citrus peels.

MotherEarth[®] **2% Py Contact Insecticide** and **MotherEarth[®] Exempt** **Contact Insecticide**

effectively control a wide range of crawling and flying insects, including **ants, bed bugs, centipedes, cockroaches, spiders, ticks, wasps and other pests.** They both feature botanical active ingredients that are derived from plants.
