For use in Homes, Apartment Buildings, Stores, Restaurants (non-food areas), Warehouses, Government Offices, Public Buildings and Institutions.

Apply bait lightly to floors near baseboards, in closets, under sinks and refrigerators, around and inside garbage cans, and in other areas where insects are found but which are inaccessible to children such as cracks and crevices. (Do not make crack and crevice applications in California.) Do not apply to animals. Do not treat portions of buildings where animals can feed on bait. Use approximately 4 ounces of bait per 1,000 sq. ft. of space and scatter lightly so that bait is barely visible. Repeat as necessary. Keep out of reach of children.

RESTRICTIONS

Do not apply to floors or other surfaces likely to be contacted by children or pets.

For Use By Pest Control Operators in Restaurants (food areas), Poultry Packing, Red Meat Packing and Food Processing Plants, including plants that are Federally Inspected, as well as food processing areas of stores, warehouses, Government Offices, Public Buildings and Institutions.

Locate these bait stations on window sills, on floors near walls, in storage areas and other areas where insects have been observed. Maintain strict account of location and number of bait stations. Do not apply bait in edible product areas until operations have ceased for the day. Remove all bait stations from the edible products areas before resuming operations. Do not store Prentox Larva-Lur in or around such processing plants.

For Use in Research Facilities: The use of Propoxur in research animal quarters for pest control will **not** induce changes in liver microsomal enzyme activity in these animals. Prentox Larva-Lur should not be applied directly on animals nor applied where animals can feed on the bait.

For Outdoor Use around patios, driveways, sidewalks, and foundations only. Apply bait evenly in a band 2 to 3 feet wide at the rate of 4 oz. per 1000 sq. ft. around foundations, patios, driveways, or sidewalks, taking care to treat any cracks or crevices. For maximum effectiveness treat beneath concrete drain splashpans.
