## EPA Registered Plant Growth Regulator

Ascend<sup>®</sup> SL PGR contains an optimal combination of three EPA registered plant growth regulators designed to provide vigorous early plant germination and emergence, a robust root system, larger leaves and wider stems. The product can be applied as a seed treatment, in-furrow or as a foliar application.

### FEATURES AND BENEFITS

- Cytokinin promotes cell division and leaf expansion.
- Gibberellic acid stimulates cell division and elongation in leaves and stems.
- Indolebutyric acid stimulates root formation and development, and increases cell elongation.
