Milorganit

Milorganite® 6-2-0 Classic

Milorganite® 6-2-0 Classic

PROFESSIONAL TURFGRASS - ORGANIC NITROGEN FERTILIZER

- NON-BURNING ORGANIC NITROGEN
- RICH IN WATER INSOLUBLE NITROGEN
- 4% ORGANICALLY COMPLEXED IRON AIDS DEEP GREEN COLORING
- CONSISTENT QUALITY

Nitrogen - Milorganite* 6-2-0 Classic contains organic nitrogen, over 85% being Water Insoluble Nitrogen. This nitrogen releases as plants need it, minimizing leaching and runoff into groundwater. This non-burning organic nitrogen contains no salts. It can be safely applied during hot, dry summer months without risk of burning plants.

Iron - Milorganite* 6-2-0 Classic contains 4% organically complexed iron. This non-staining iron source is readily available to give plants a deep green color, preventing chlorosis throughout the season.

Quality - Milorganite* 6-2-0 Classic has been manufactured and sold for over 75 years. Consistent granule size and hardness make Milorganite* 6-2-0 the standard of the industry. Bag after bag. Year after year.

Environmental Respect

EXPLIP OFFITTER TAXESPECT.

Milorganite products are recycled biosolids. Milorganite products proudly meet U.S. Environmental Protection Agency's "Exceptio Quality" standards for baneficial use. This designation means that Milorganite products can be used anywhere fertifizer is recommend. Nitrogen in Milorganite products releases slowly, guaranteeing a long feeding period. This also helps to minimize polarital environmental impact from runoff or nutritien feeching into ground water.

Apply Milorganite products according to lated directions. Avoid direct application on impensious surfaces, steep slopes, areas that flood, wetlands, or into surface water. After using Milorganite, wash hands and store unused product in a cool, dy area, away from children and peters.
