

Orthene® PCO Pellets–Indoor Spray

For Use Only By Professional Applicators

Orthene PCO Pellets is a powerful and effective product that controls pests within industrial, institutional and commercial buildings, including restaurants, warehouses, stores, hospitals, hotels, manufacturing plants and ships. This product delivers the best results when used properly by a professional applicator.

Directions for Orthene PCO Pellets Use

Desired Concentration Wt./Wt.	Grams Per 1 Gal. Water	Ounce Per 1 Gal. Water	Number of Packets in 1 Gal. Water
1/2%	19.5	0.7	1/2
3/4%	29.3	1.0	3/4
1%	39.0	1.4	1

Use Orthene PCO Pellets as a 0.75% or 1.0% spray for residual pest control in areas listed by application. Use the 0.75% rate for control of light infestations on nonporous surfaces and the 1.0% spray to quickly reduce heavy infestations. Activity on porous surfaces may be limited. Repeat treatment as needed.

Not for use in feed processing areas in feed handling establishments.

CAUTION: To reduce potential odor problems, follow manufacturer's directions. Use in well-ventilated rooms. Do not treat unpainted masonry or porous floors in poorly ventilated areas such as garages or basements, especially where moisture or high humidity exists as odor may develop. If odor occurs, dilute the dry spray residue with soap and water. Rinse area well; if odor persists, repeat process. Do not apply directly to carpet as staining may occur.

Food Handling Establishments

For use in federally inspected poultry and meat packing plants and places other than private residences in which exposed food is held, processed, prepared or served.

Food Areas

Application limited to crack and crevice or spot treatment only! Application areas include receiving shipping, storage, packing (canning, wrapping, bottling, boxing) and preparing areas and in edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups). Apply in small amounts directly into cracks and crevices using a pin-stream of insecticide in points between different elements of construction, between equipment and floors, in openings leading to voids and in hollow spaces in walls and around equipment legs and bases where labeled insects hide.

Care must be taken to avoid depositing this product onto exposed surfaces or introducing the product into the air. Avoid contamination of food or food processing surfaces.

Application of this product in the food areas of food handling establishments, other than as a crack and crevice or spot treatment are NOT PERMITTED.

Serving Areas

Facilities where prepared foods are served, such as dining rooms, but excluding areas where foods may be prepared or held: Apply as a spot treatment to selective surfaces such as baseboards, under elements of construction and into cracks and crevices. Do not apply when facility is in operation or foods are exposed. Do not allow spray or mist to contact food, foodstuffs or water supplies. Dishes and food handling utensils should be thoroughly washed in soap and water if exposed to contamination by the application of this product. Do not allow children or pets to contact treated surfaces until sprays have dried.
