IMPORTANT:
ALWAYS READ AND FOLLOW
LABEL INSTRUCTIONS.

Sulfentrazone 4L SELECT™ is a soil-applied selective, flowable herbicide that contains 4 pounds of active ingredient per gallon. Sulfentrazone 4L Select can be used to control broadleaf, grass and sedge weeds in established turfgrasses (seeded, sodded or sprigged), including residential and institutional lawns, athletic fields, golf course fairways and roughs, commercial sod farms and many non-crop and industrial sites. Best control is achieved with grassy weeds when applied to grasses that are actively growing and small (pre tiller stage). For optimum control of broadleaf weeds, applications should be made shortly after weed emergence.

- Visible results in 24-48 hours
- Controls weeds both pre- and post-emergence
- Tough on weeds, gentle on established turfgrass
- Available in 6 oz and 64 oz bottles
