High purity PGRs
for increased size
and quality in apples
and pears

fine
Excellence in PGR technology

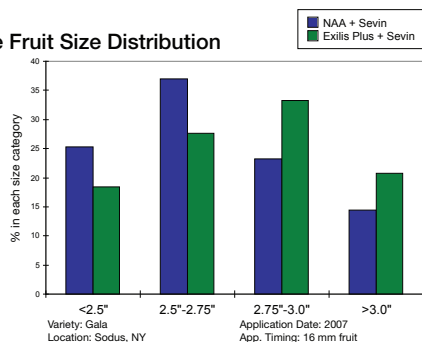

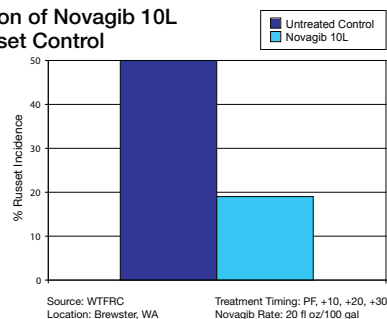

- Selectively thins apple and pear crops.
- Directly increases fruit size and quality.
- Contains highest percentage 6-BA compared to competitive products.
- Consistently performed equal or superior to competitive 6-BA products in major university trials.

- Contains ultra-pure GA4.
- Helps protect crops from moisture-related russet.
- Improves overall skin finish and fruit quality.
- Minimal inhibition of return bloom.
- Approved by WSDA and OMRI – can be used by organic growers for improved fruit finish and sizing.
