Three-In-One Application

Drop Spreader Hydroseeding By Hand

- **Enhanced germination**
- Can be used on moderate slopes, up to 3:1
- Made with recycled paper and corn fiber
- Reduces evaporation
- No clean-up

- Biodegradable
- **Provides weed-free** straw alternative
- Reduces runoff
- Easy loading into hydroseeding tank
- Dark green color

The smart choice of turfgrass professionals

#056000 50 LB NET WT. (22.7 KG)

Use Instructions:

Hydroseeder

Application

Seed Starter 3 should be mixed with water in a hydraulic seeding machine at the rate of 50 lbs. of fiber per 125 gallons of water. The product can be used in both jet and paddle agitated machines and should mix in the tank for a minimum of 10-15 minutes

LOADING INSTRUCTIONS:

prior to application.

- 1. Fill the tank 1/3 full with water. 2. Turn seeding machine on.
- 3. Engage pump/clutch for paddles.
- 4. Purge system and pre-wet hose. 5. Add tackifier (optional, mix according
- to manufacturer's recommendations).
- 6. Pour in first bag of Seed Starter 3. 7. Add grass seed.
- 8. Continue to fill tank with water while
- adding additional Seed Starter 3. 9. All Seed Starter 3 should be in tank
- before tank is full of water.
- 10. Add fertilizer (optional).
- 11. Mix materials for at least 10 minutes, or until pellet fiber is soft, prior to spraying.
- 12. Purge system with clean water after use.

Drop Spreader Application

Application by Hand

Seed Starter 3 is applied at a rate of 50 lbs. per 750 sq. ft. and can be made using a LESCO 36" drop spreader with the special 1/2" fixed bottom. Water treat area sufficiently to expand pellets once application is complete. The easy-to-apply pellets absorb rainfall or irrigation water rapidly, expanding to provide increased surface coverage.

Easy application can be made by filling a bucket with Seed Starter 3 and spreading by hand to fill thin and small bare areas. Apply one bag to cover 750 sq. ft. surface area. Pellets absorb rainfall or irrigation rapidly, expanding to provide increased surface coverage.

Technical Data:

Organic Content	>99%	SAS*	500	
Moisture Content	10% <u>+</u> 2%	Water Holding Capacity	>400%	
Color	Green	Weight 50	50 lb. per bag	
		*(grams force per gram mulch)		

Product Statement:

Seed Starter 3 comprised of a unique blend of paper, corn fiber and pantago tackifier. This unique form allows for hydraulic seeder, drop spreader and hand applications. Once seed and fertilizer have been applied (with drop spreader or by hand) according to recommended rates, this product should be spread evenly over the prepared seed bed. To maximize seed performance, seed must have good seed-to-soil contact and be kept from drying out after seed germination. Use a quality LESCO starter fertilizer to achieve best results. After applying LESCO Seed Starter 3 by hand or using a drop spreader, water must be applied to hydrate mulch pellets. The pellets will hold up to four (4) times their weight in water, allowing protection for the seed from drying out. Increased application rate in case of limited watering frequency should not exceed a 2X rate. RECYCLED
