

SUPER TRIMEC® BROADLEAF HERBICIDE

Extend open season on
hard-to-control broadleaf weeds.

Reduce call-backs and handle more customers – without creating unnecessary concerns due to odor. Low-odor Super Trimec® Broadleaf Herbicide means greater efficiency . . . with fewer problems.

Super Trimec was developed for the professional and provides rapid and thorough foliar absorption, making sudden rain less of a threat. Even after a freeze, Super Trimec will remain active and provide control when the weather warms up. Super Trimec enables you to start earlier

in the season . . . or *extend* your season later than most herbicides.

Most lawn care companies and golf courses that are using Super Trimec tell us that they are using it as a broadcast treatment only once per season and then using spot treatments for hardened-off summer weeds.

The bottom line is that Super Trimec is one of the most economical herbicides on the market in terms of cost-per-acre of immaculate, weed-free turf.

Trimec is a registered trademark of
PBI-GORDON CORPORATION.

RECOMMENDATIONS

Post-emergence broadleaf weed control in turf; golf courses, lawns, cemeteries, public parks, sports turf, sod farms and other sites.

ACTIVE INGREDIENTS:

Isooctyl (2-ethylhexyl) ester of 2,4-dichlorophenoxyacetic acid . . .	32.45%

- Low-odor formulation
- Readily penetrates plant leaves
- Specially formulated for cool-season grasses and certain warm-season grasses
- Optimum cool-weather performance
- Use in early spring, late fall, and for mid-summer spot treatments

- Controls a wide range of tough broadleaf weeds: clover, spurge, oxalis, wild violet, wild onion, wild garlic and ground ivy
- Effective on mature weeds
- Provides rapid, visible signs such as stem twisting and leaf curling
- Labeled for sod farm use
